Dear Florida Citrus Mutual Members and Friends:

It is with great pleasure that I share the news that we were informed late this afternoon by the Florida Department of Agriculture and Consumer Services that the request for a Section 24(c) Registration related to the use of ReMedium TI®, a systemic injectable antimicrobial for the control or suppression of HLB, has been approved.

After many months of collaboration between registrant TJ BioTech, LLC, Florida Citrus Mutual, CRDF and FDACS, this approval could not come at a more critical time. This 24(c) will allow for ReMedium TI® to be a vital tool in growers toolboxes, giving our industry a fighting chance to save Florida's iconic groves.

Look to future editions of the *Triangle* for additional details related to the approval and availability of ReMedium TI® as they become available.

Regards,

Matt
